Lead Magnet Creation

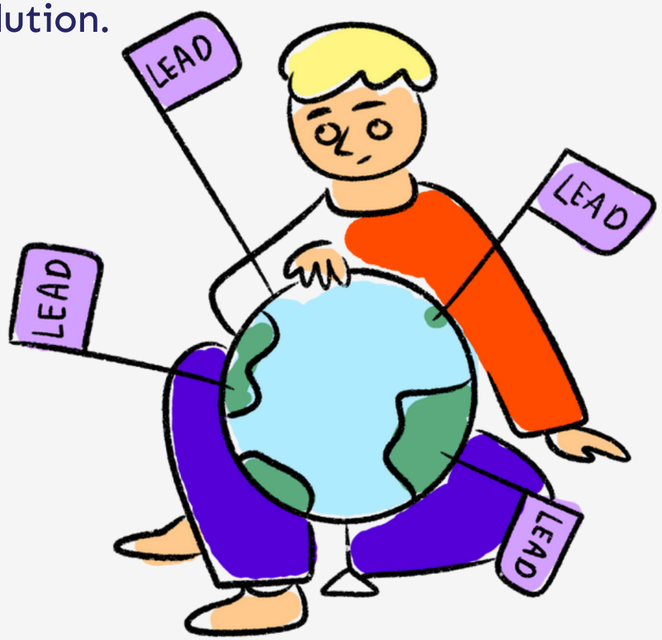

A practical guide by ken

What is a lead magnet?

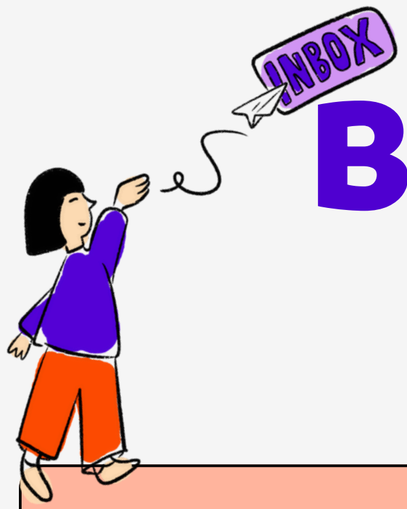

A lead magnet is a complete solution to a narrow problem that attracts ideal customers and makes them more likely to buy your core offering. For B2B SaaS companies, effective lead magnets must be scalable, easy to create, and deliver immediate value while revealing the need for your broader solution.

Give Away The Secrets, Sell The Implementation

The marketplace judges everything you offer - free or not. You can never provide too much value, but you can provide too little. Your lead magnet should provide so much value that people feel obligated to pay you. The goal is to provide more value than the cost of your core offer before they've bought it.

What Makes a Great B2B SaaS Lead Magnet

Core Principles

01

Solves a Narrow, Meaningful Problem

Address a specific pain point your target persona faces daily

02

Scalable

Can be delivered to unlimited prospects without manual customization

03

Quick to Consume

Provides value within minutes, not hours

04

Reveals a Bigger Problem

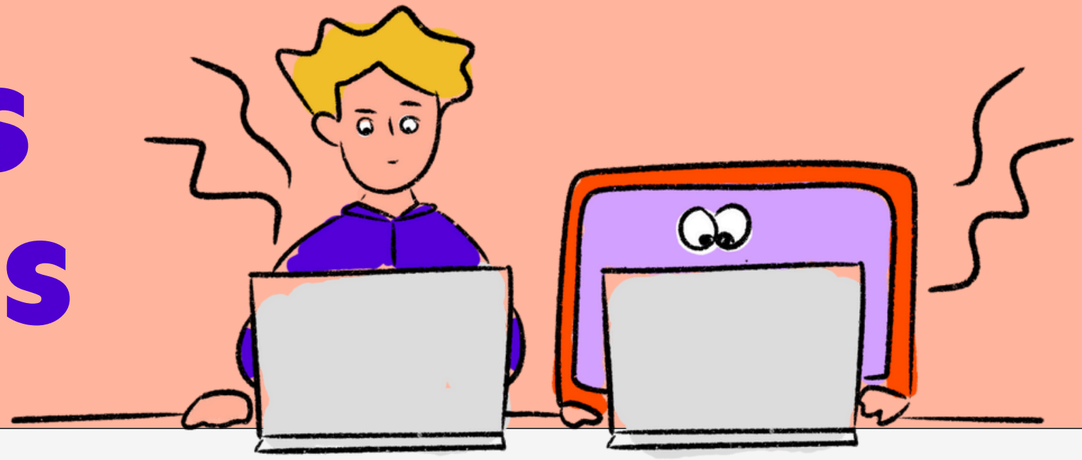

Once solved, it naturally leads to your core SaaS solution

05

Data-Driven

Uses specific metrics and insights that resonate with B2B buyers

The Three Types of Lead Magnets

PROBLEM REVEALERS

- Diagnose issues the prospect doesn't fully realize
- Audits, assessments, benchmarking tools
- Work best for problems that worsen over time

SAMPLES & TRIALS

- Limited access to your core offering
- Free trials, freemium versions, limited credits
- Ideal for recurring solutions to recurring problems

ONE STEP SOLUTIONS

- Solve one piece of a multi-step process
- Templates, calculators, single-feature tools
- Perfect for complex B2B processes

Delivery Mechanisms for B2B SaaS

SOFTWARE/TOOLS

Calculators, analyzers, Chrome extensions

INFORMATION

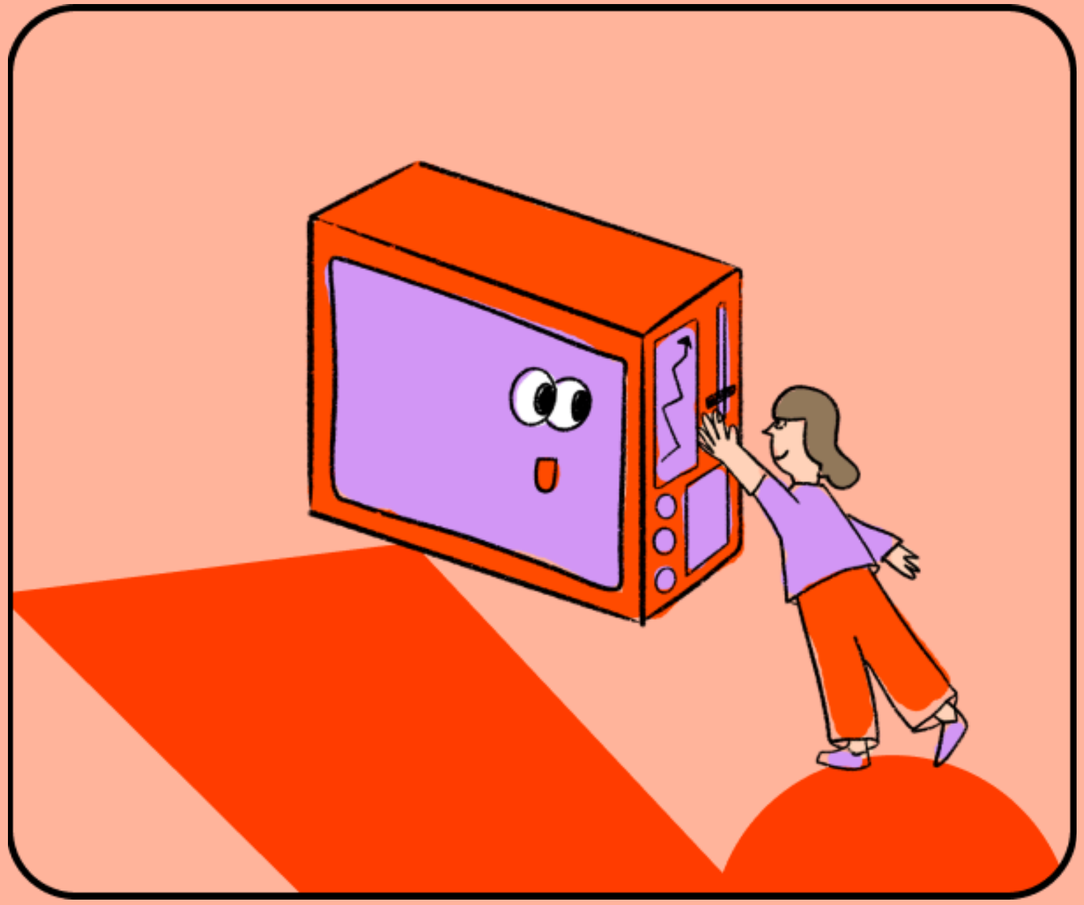

Reports, guides, video tutorials, webinars

SERVICES

Audits, consultations, implementation assistance

HYBRID

Combining multiple formats for maximum engagement

Advanced B2B SaaS Lead Magnet Strategies

The Trojan Horse Method

Create tools that work standalone but work 10x better with your product.

Example: A project template that's good alone but amazing with your project management tool

The Habit Builder

Design daily-use tools that create habits leading to your product.

Example: A daily standup bot that eventually needs your full collaboration platform

The "Marketplace" Model

Create a lead magnet that's actually a marketplace connecting prospects with solutions/services.

How it works

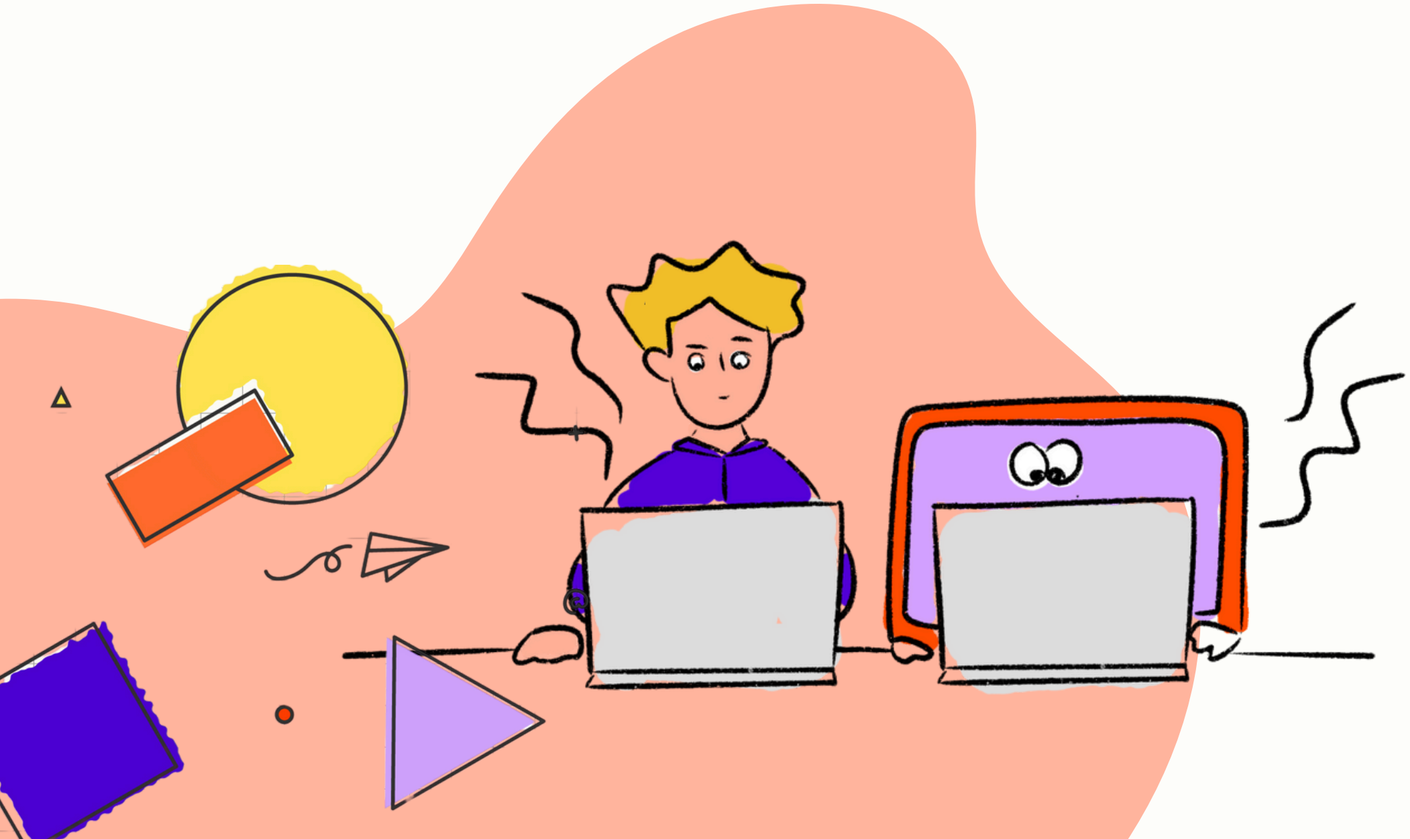

- Build a platform that provides value to multiple parties
- Your prospects get free value from other vendors
- You become the trusted curator and eventually the solution

Examples:

- Marketplace with all businesses in a certain location (like Yelp)

The "Developer Ecosystem" Play

Build lead magnets that developers want to build on top of.

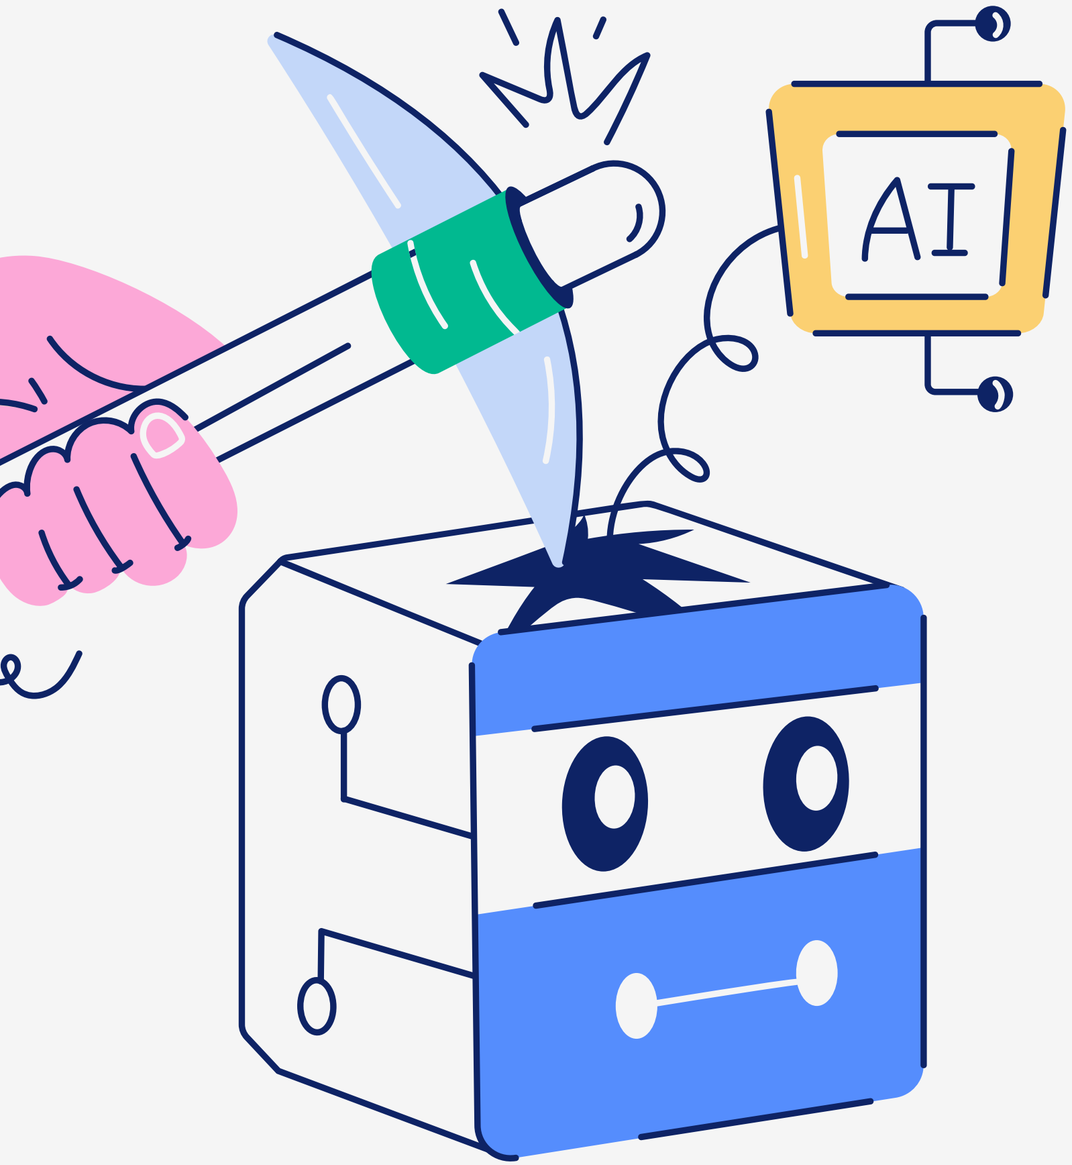

How it works:

- Create open-source tools with API access
- Let developers extend functionality
- Their additions bring their networks

Examples:

- Open Source Analytics Library: With your platform as the easiest hosting option
- API Testing Toolkit: That works best with your infrastructure
- Integration Framework: Making it easy to connect tools (ultimately through your platform)

The "Predictive Power" Play

Use ML/AI to predict future problems before they happen.

How it works:

- Analyze current state data
- Predict future issues/opportunities
- Position your product as the solution

Examples:

- Churn Prediction Model: Free analysis of customer base
- Revenue Forecasting Tool: Based on current pipeline
- Technical Debt Calculator: Predicts future development slowdowns

The "AI Employee" Preview

Offer an AI agent that does real work for them.

How it works:

- AI agent performs specific role
- Shows future of work
- Upgrade for more agents/capabilities

Examples:

- AI SDR: Books meetings automatically
- AI Analyst: Generates reports from data
- AI Customer Success Manager: Monitors and engages customers

Lovable Apps

- **Single-purpose, beautifully designed tools**
- **Solve one workflow perfectly**

Examples:

- ROI Calculator: Calculate savings from your solution
- Team Health Monitor: Weekly pulse surveys with insights
- Compliance Checker: Automated audit tool

AI Tools

- **Leverage AI to provide instant value**
- **Show the future of the industry**

Examples:

- AI Sales Email Writer: Generate personalized outreach
- Smart Contract Analyzer: Find risks in legal documents
- Predictive Churn Model: Identify at-risk customers

Separated SaaS Features

- **Extract your best feature as standalone**
- **Full functionality, no strings attached**

Examples:

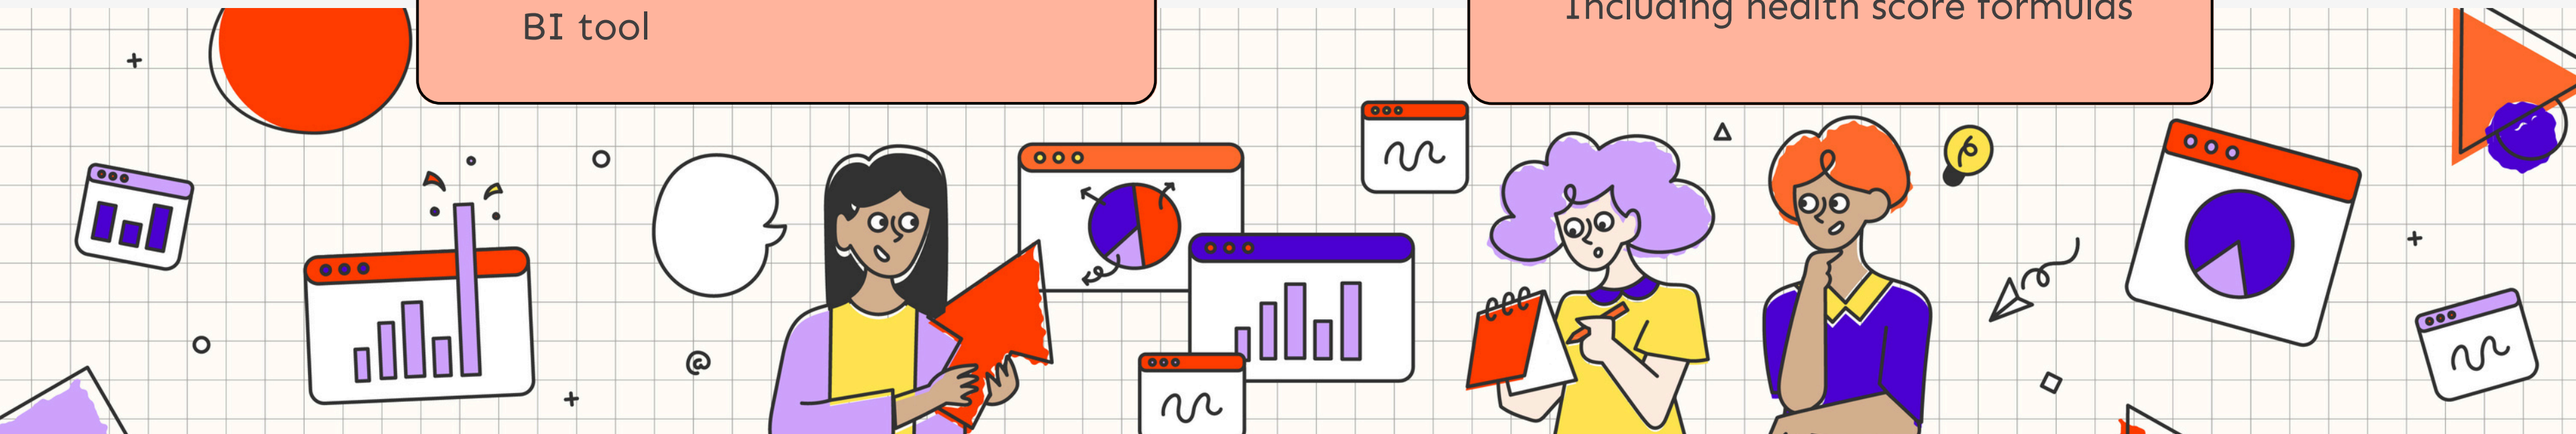

- Data Visualization Tool: From your analytics platform
- Workflow Builder: From your automation suite
- Report Designer: From your BI tool

Templates & Frameworks

- **Industry-specific, battle-tested templates**
- **Immediate implementation value**

Examples:

- Sales Playbook Template: Complete with scripts and processes
- OKR Planning Framework: With tracking spreadsheet
- Customer Success Blueprint: Including health score formulas

Mini-Courses

- **5-day email courses solving specific problems**
- **Video series with actionable homework**

Examples:

- "Scale Your SaaS to $10M ARR"
- "Build a Predictable Sales Machine"
- "Master Product-Led Growth"

Information

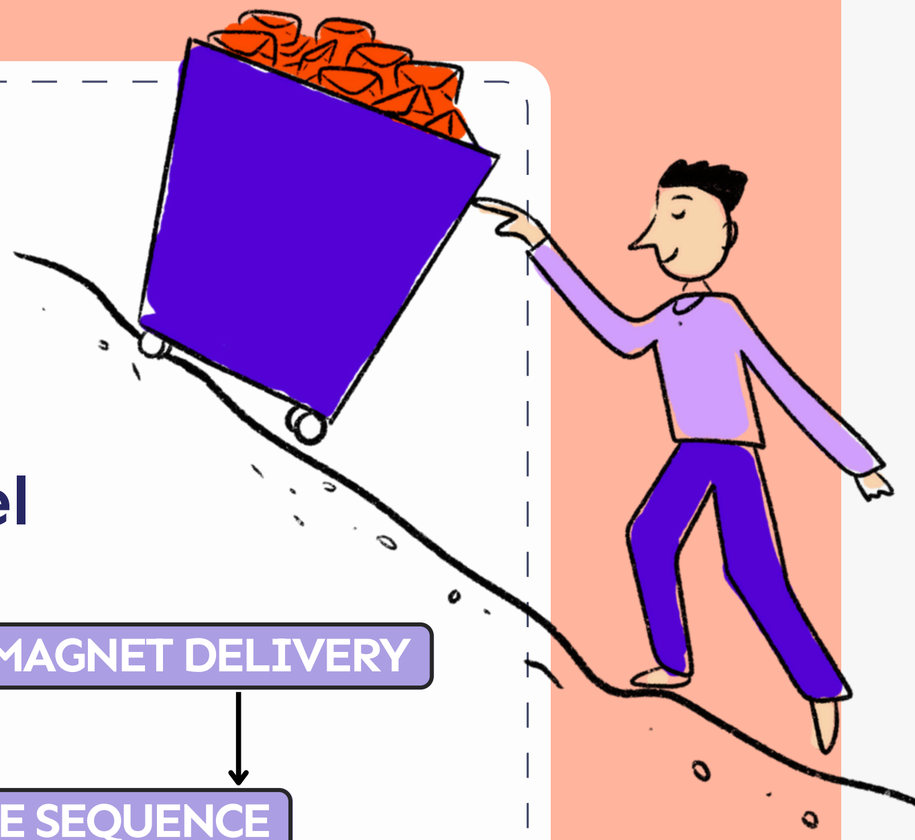

- **Educational VSL**
- **Short video demo**

Examples:

- “Funnel overview - Using a Course to Upsell Your Product or SaaS”

How to "Sell" Your B2B SaaS Lead Magnet

The Lead Magnet Funnel

COLD EMAIL → LANDING PAGE → LEAD MAGNET DELIVERY

↓

EMAIL NURTURE SEQUENCE → SALES CONVERSATION

LANDING PAGE

- Short
- To the point
- Show the lead magnet in action (video/screenshots)

Landing Page tools:

- Click Funnels
- GoHighLevel
- Unbounce

Example: Lamz

EMAIL NURTURE SEQUENCE

- 3-7 emails. Email Nurture Sequence:
- Delivery + Quick Win
- Success Story
- Common Mistake
- Advanced Strategy
- FAQ/Objections
- Direct Offer
